

# Zonal Connect What's New

Version 1.01 | 19 November 2024

**Directory**

## Organisation

The following updates have been made to the Organisation in the Directory app in this release of Zonal Connect.

For more information view our individual help page topics.

## Sites

---

### Update

---

The Aztec Site ID has now been included in the status bar displayed at the top of a site setup section

---

Improving the setup of managing sites a new field has been introduced which enables the Aztec Site PC IP address to be added (which will sync with Aztec)

---

## Permissions

The following updates have been made to the Permissions in the Directory app in this release of Zonal Connect.

For more information view our individual help page topics.

---

### Update

---

When assigning permissions, certain dependent permissions may need to be activated to ensure users can access the necessary settings. With this update, a notification is displayed upon saving the permission group, alerting the user that additional permissions have been automatically enabled to ensure proper functionality

---

Improving the user experience managing custom permission groups has been updates so that it is easier to navigate between the different apps and available permissions

---
