

Zonal Connect What's New

Version 1.01 | 19 November 2024

Pricing

Price Groups

The following updates have been made to Price Groups Pricing app in this release of Zonal Connect.

For more information view our individual help page topics.

Update

When managing large organisations with multiple price groups, it's now easier to view which sites are allocated to each group, this information is accessible from the three dot menu

When off band prices are applied to sales items, the grid now displays this information with an icon at the start of the row. Additionally, the corresponding price band is highlighted in yellow to indicate off band pricing. Hovering over the row reveals further details, such as the site, sales area, and specific off band prices being used

Finding sales items within the grid has been made even easier by having a search, the available search terms are name, description, ID and external reference 1

Existing price groups can be duplicated to create a direct copy, enabling faster updates and price changes

For ease of navigation each sales item is now displayed as a hyperlink allowing a direct link into the products app

Greater flexibility in price band management has been introduced, allowing you to delete, duplicate, and easily copy and paste prices between bands, improving the process of updating prices

Two convenient options are now available in the grid to easily revert price changes. Before saving, you can undo any modifications, and after saving, you can revert the data back to its previously saved state. This ensures that any mistakes or incorrect entries can be quickly corrected

To streamline updates within a price group, data can now be exported to a spread sheet, prices modified as needed, and then seamlessly imported back into the pricing app, boosting productivity and efficiency

The grid is now more flexible, allowing columns to be sorted in various ways for easier data viewing. Additionally, when working with a large number of price bands, product and related columns can be frozen, ensuring they remain visible while scrolling across the grid

Site Price Groups

The following updates have been made to Site Price Groups in the Pricing app in this release of Zonal Connect.

For more information view our individual help page topics.

Update

Finding sites within the grid has been made even easier by having a search, the available search terms are name and site reference

Column headers can now be used to group the grid in alternative views, simply drag one or more headers to the group area to activate this feature, making it easier to organise data

Before saving, you can undo any modifications made to the site price group grid

To streamline updates within a site group, data can now be exported to a spreadsheet, modified as needed, and then seamlessly imported back into the pricing app, boosting productivity and efficiency

Banding

The following updates have been made to Banding in the Pricing app in this release of Zonal Connect.

For more information view our individual help page topics.

Update

Column headers can now be used to group the grid in alternative views, simply drag one or more headers to the group area to activate this feature, making it easier to organise data

When making banding changes and prior to save any assignments can be reversed with the undo function

When viewing the grid a default selection of columns are displayed, within the column selector additional columns of category and site reference can be also displayed

When managing a large number of subcategory assignments the bulk assignment option now enables this action to be completed quickly

Finding sites within the grid has been made even easier by having a search, the available search terms are site name, site reference and sales area name

Supplement banding data can be exported to a spread sheet for easier viewing and analysis outside of the pricing app

Sales area banding data can be exported to a spread sheet for easier viewing and analysis outside of the pricing app

Off Band Pricing

The following updates have been made to Off Band Pricing in the Pricing app in this release of Zonal Connect.

For more information view our individual help page topics.

Update

Finding sales items within the grid has been made even easier by having a search, the available search terms are name, description, ID and external reference 1

Two convenient options are now available in the grid to easily revert off band price changes. Before saving, you can undo any modifications, and after saving, you can revert the data back to its previously saved state. This ensures that any mistakes or incorrect entries can be quickly corrected

The normal selling price from the set price band will now be shown as an additional column within the grid

To streamline updates within off band pricing, data can now be exported to a spreadsheet, modified as needed, and then seamlessly imported back into the pricing app, boosting productivity and efficiency

The off band pricing grid now offers full control over the displayed columns, providing flexibility to view only the necessary data. Users can customize the columns and easily sort by their contents for a more streamlined experience
