

# Zonal Connect What's New

Version 1.01 | 19 November 2024

**Products**

## Sales Items

The following updates have been made to Sales Items in this release of Zonal Connect.

For more information view our individual help page topics.

## General Updates

---

### Update

---

The sync status of the sales item is displayed showing if the item has successfully linked to other Aztec and iOrder Platform

---

## Item Details

---

### Update

---

Up to 40 choices can be added to the sales item enabling advanced sales item creation

---

---

Up to 40 items can be added to the ingredients tab allowing for complex sales item (recipe) creation

---

---

Complete the setup of a sales item quickly by enter selling prices for any price group and band without leaving the item

---

---

Add ingredients to a sales item, including purchase, prep and other sales items, enabling sorting by custom or alphabetical order, portion and ingredient mapping for the correct stock reduction when items are sold

---

---

Manage item costings and calculate a suggested selling price or GP%/ Cost% by entering values per portion

---

## Display Details

---

### Update

---

Images can be selected from Media Manager to be assigned to display records

---

## Other Configuration

---

### Update

---

Any portions added to a sales item can have their name and description updated where these are viewed on guest facing menus

---

Enter barcodes to a sales item so these product types can be scanned at the POS terminal for quick sales, including single or range barcodes (this does not including custom barcodes within this version)

---

## Choices

The following updates have been made to Choices in this release of Zonal Connect.

For more information view our individual help page topics.

## General Updates

---

### Update

The sync status of the choice is displayed showing if the item has successfully linked to other Aztec and iOrder Platform

---

## Options

---

### Update

The budgeted cost per portions is show based on the choice costings configured in settings or override on the selected choice

---

## Display Details

---

## Purchase Items

The following updates have been made to Purchase Items in this release of Zonal Connect.

For more information view our individual help page topics.

## General Updates

### Update

Selecting an existing purchase item will give the option to "clone", allowing for an exact copy to be created

Filtering by product structure and tags gives the ability to have a smaller subset of items to work with in the list

Quickly find purchase items by using search, entering the search term by name, description, ID or external reference  
1

The sync status of the purchase item is displayed showing if the item has successfully linked to Aztec

## Main Details

### Update

Enter all the information required for the purchase item in the main details tab, including names, description, sub-category, tags and tax rules

## Supplier

### Update

Purchase units can be individually configured to determine if an item is purchasable by enabling the "Can Order" option. When activated, the item will be included in the product catalogue within Acquire. Discontinuing an item will automatically remove the can order option from all purchase units

Items can be configured to be variable weight, where the weight may change once the item has been dispatched (this setting is used in conjunction with Acquire)

Enter all supplier information against the purchase item including pack size, variant, product code, barcode and cost price

## Related Items

---

Update

---

View related records where the purchase item is being used as an ingredient either in other prep or sales items

---
