

Zonal Connect What's New

Version 1.02 | 11 February 2025

Products

Sales Items

The following updates have been made to Sales Items in this release of Zonal Connect.

For more information view our individual help page topics.

General Updates

Update

Sales items can now be deleted, removing them from the Products App, any sales item linked to a choice, prep or other sales item as an ingredient will automatically be removed, deletions will automatically be sent to Aztec

When applying filters to sales items the "list type" tags are now displayed in the drop down for selection

Main Details

Update

Any tags that have been created as a "list type" can now be selected from the tag drop down, only 1 tag from that group can be selected

Choices

The following updates have been made to Choices in this release of Zonal Connect.

For more information view our individual help page topics.

General Updates

Update

Choices can now be deleted, removing them from the Products App, any choice linked to a sales item will automatically be removed, deletions will automatically be sent to Aztec

When applying filters to choices the "list type" tags are now displayed in the drop down for selection

Main Details

Update

A multi-select choice must have at least two options - if an attempt is made to delete one of those options (sales item or choice) it will be prevented and to continue other options should be added or the choice multi-select check box is disabled

Any tags that have been created as a "list type" can now be selected from the tag drop down, only 1 tag from that group can be selected

Instructions

The following updates have been made to Instructions in this release of Zonal Connect.

For more information view our individual help page topics.

General Updates

Update

Instructions can now be deleted, removing them from the Products App, any instruction linked to a choice will automatically be removed, deletions will automatically be sent to Aztec

When filtering for instructions "list type" tags are now displayed in the drop down, for selection

Main Details

Update

Any tags that have been created as a "list type" can now be selected from the tag drop down, only 1 tag from that group can be selected

Purchase Items

The following updates have been made to Purchase Items in this release of Zonal Connect.

For more information view our individual help page topics.

General Updates

Update

Purchase items can now be deleted, removing them from the Products App, any purchase item linked to a prep or sales item as an ingredient will automatically be removed, deletions will automatically be sent to Aztec

The following updates have been made to Purchase Items in this release of Zonal Connect.

For more information view our individual help page topics.

General Updates

Update

Prep items can now be deleted, removing them from the Products App, any prep item linked to a sales item as an ingredient will automatically be removed, deletions will automatically be sent to Aztec

When applying filters to prep items the "list type" tags are now displayed in the drop down for selection

Main Details

Update

Any tags that have been created as a "list type" can now be selected from the tag drop down, only 1 tag from that group can be selected

Item Details

Update

Validation has been added to prevent adding sales items that contain multi-select choices as an ingredient within a prep item

Product Admin

The following updates have been made to Product Admin in this release of Zonal Connect.

For more information view our individual help page topics.

Courses

Update

When editing courses and using the sort order function, this information is important for printing so that courses are displayed in the correct order, the sort order is now synced with Aztec when making adjustments

Suppliers

Update

When updating the Acquire Integration ID, new validation ensures that two suppliers cannot have the same Integration ID within the same customer account. This prevents potential data issues in the Acquire integration

Units

Update

To speed up the creation of units they can be added with the "bulk add" option, enabling the same unit type to be created multiple times in on screen without having to add them individually
